drill.cpp – the drill exercise from chapter 12

Drill

The drill is the graphical equivalent to the "Hello, World!" program. Its purpose is to get you acquainted with the simplest graphical output tools.

- I. Get an empty Simple_window with the size 600 by 400 and a label My window compiled, linked, and run. Note that you have to link the FLTK library as described in Appendix D; #include Graph.h and Simple window.h in your code, and include Graph.cpp and Window.cpp in your
- 2. Now add the examples from §12.7 one by one, testing between each added subsection example.
- 3. Go through and make one minor change (e.g., in color, in location, or in number of points) to each of the subsection examples.

Review

exercise.cpp – exercises from 1 to 4 from chapter 12

Exercises

We recommend that you use Simple_window for these exercises.

- 1. Draw a rectangle as a Rectangle and as a Polygon. Make the lines of the Polygon red and the lines of the Rectangle blue.
- 2. Draw a 100-by-30 Rectangle and place the text "Howdy!" inside it.
- 3. Draw your initials 150 pixels high. Use a thick line. Draw each initial in a different color.
- 4. Draw a 3-by-3 tie-tac-toe board of alternating white and red squares.
