drill_input.txt – patterns from §23.7

table.txt – table from §23.9

drill.cpp – the drill exercise from Chapter 23

1. Find out if **regex** is shipped as part of your standard library. Hint: T std::regex and **tr1::regex**.
2. Get the little program from §23.7 to work; that may involve figuring how to set the project and/or command-line options to link to the re library and use the **regex** headers.
3. Use the program from drill 2 to test the patterns from §23.7.

exercise10-11.cpp – exercise 10,11 from Chapter 23

10. Modify the table-checking program from §23.9 to write a new table where the rows with the same initial digit (indicating the year: first grades start with 1) are merged.
11. Modify the table-checking program from §23.9 to see if the number of students is increasing or decreasing over the years in question.
